## **DETAILED ACTION**

This office action is in response to the amendment of December 8, 2005. In making the below rejections the examiner has considered and addressed each of the applicant's arguments.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 4, 6, 10, 12 and 15-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims have been amended to recite that "a fuel reservoir is formed between said end of the sliding portion and one of said seal devices mounted on a side of said end of the sliding portion, the fuel reservoir being in fluid communication with a suction chamber of said pump within said pump". The elected embodiment of Fig. 12 (and described at pages 25 through page 27) discloses a first seal (31) which is immediately adjacent to the end of the cylinder and the second seal (30) is spaced from and forms a plunger seal chamber

Art Unit: 3746

(30a) which collects lubricant (note page 27 lines 2 and 3). Further, the plunger seal chamber does not communicate with the suction chamber.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 3, 4, 6, 10, 12 and 15-17 have been considered but are moot in view of the new ground(s) of rejection.

The examiner notes that the applicant's arguments with regards to the Saito reference not being prior art have been considered and the examiner agrees. The Saito reference cannot be properly applied as prior art. However, this point is moot because of the rejections set forth above under 35 USC 112, first paragraph.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
